MICRONEEDLING

What Is Micro Needling:
Microneedling is used to treat and improve conditions like acne scarring, fine lines and wrinkles, loose skin, skin texture, pore size, brown spots, stretch marks, and pigment issues. It's also called skin needling, collagen induction therapy (CIT), and percutaneous collagen induction (PCI) also Micro-needling or Micro Pen is a procedure that uses small needles to prick the skin. The purpose of treatment is to generate new collagen and skin tissue for smoother, firmer, more toned skin. Microneedling is mostly used on the face and may treat various scars, wrinkles, and large pores.

What Are The Benefits:
The loss of elastin and collagen cause thinning, sagging skin, and facial wrinkles. Micro-needling stimulates the production of natural elastin and collagen that reduces wrinkles and fine lines. You'll have younger looking skin with no downtime.

Does It Hurt:
After letting the numbing cream seep into my skin for a half hour, having a bunch of needles continuously puncture my skin was honestly an easy process. So to definitively answer that, it doesn't hurt, but it doesn't feel good.

How Long Till I See A Result:
The results from micro-needling skin remodelling can go on for months after each treatment. Results can be seen from one to eight weeks later. Typically you will see results after your first treatment. Lasting and more significant results will occur after 4-6 treatments when spaced 4 to 6

REVIEWS

"My face felt like it was having a workout, after years of being dormant. The results are quite dramatic, my face was instantly plumper, less sallow, and for the first time in months: glowing. My skin felt brighter, softer and certainly much better than when I had walked in. I expected it to feel tight and dry a few days after the facial but no, just fresh looking lovely skin prevailing beyond what I thought would be a limit after life of a facial. It does live up to its reputation" – Antonia
"The results: Rather impressive, especially in the dreaded jowl area. Firmer, better defined contours. The more you have, the better the results. Celebrity fans: Lindsay Lohan, Sadie Frost, Anthea Turner and Martine McCutcheon. Ouch factor: 1/10. Effectiveness: 10/10 for a course."
